

Harbour Safety Bulletin Str 001 2024

Safe use of the area behind the breakwater

The marked area behind the breakwater is a blind spot for vessels entering the harbour. If it is intended to enter or use the marked area behind the breakwater, it is requested harbour staff are informed before the activity takes place. This is to allow the issue of safety communication with all other harbour users to mitigate risk of collision and assist with managing the safe use of the harbour area for all.
